RE: Site Inspection, Mike Jones, Cisco Springs #1 Mine, S/019/031, Grand County, Utah

Date of Inspection: May 6, 1997  
Time of Inspection: 950 - 1040  
Conditions: Partly cloudy, warm  
Participants: Will Stokes, SITLA; Tony Gallegos, DOGM

Purpose of Inspection: To examine the site with SITLA staff while in the area

No one was present at the site during this inspection. The overall status of the site has not changed since the last Division inspection. At this time there was some water flowing in the wash near the site. Some additional photographs were taken of some of the same areas, such as the shed, the tires, also the area of battery casings and other tires.

One reason for visiting the site was to determine if additional reclamation or cleanup work would be required by the mine operator before releasing the site as the operator had requested. Will Stokes of SITLA will be considering this issue.
